

Haarhoff (2009) describes humanity so aptly today when he says: "The age onto which we are born, the culture we live in, our parents, teachers, domineers tell us who we are, and we live out the stories they have prescribed for us."

And to "communicate ideas in Spanish and English in written and spoken through the use of strategies metalinguistic abilities as well as the technologies of the communication with aperture, sensitivity and willingness to interact in a positive manner, giving presentations in public, written in areas scholars" is a plus. Therefore, metalinguistic abilities are tools that is very helpful. That is why we teach a new communicating tool to children of Jackson Heights elementary school. "An awareness skill is that has to do with the ability of a person to reflect on and consciously ponder about oral and written language."
